Wiper Blades | Introduction

GB

The DENSO difference

Unique design features. Superior quality materials. Made to the strictest OEM standards. These are the exceptional credentials of DENSO's Wiper Blades – providing drivers with a safe, comfortable field of vision whatever the weather.

Fitted as original equipment to the windscreens of cars such as BMW's new X5 and X6 models, the Land Rover Range Rover, Jeep Cherokee, Japanese marques including Lexus, Toyota, Honda, Mazda and Suzuki, Korean marques including Hyundai and Kia, and all Ferraris since 2008, DENSO Wiper Blades are the choice of leading car makers worldwide. Why? Because in our work as one of the world's foremost developers and manufacturers of original vehicle parts and systems, DENSO is a relentless pioneer of advanced Wiper Blade technologies. From Standard and Flat blades to the latest Hybrid designs, DENSO Wiper Blades combine intelligent design, top quality materials and accurate manufacture – ensuring they wipe better and last longer.

All these advantages are also available to aftermarket customers in our DENSO Wiper Blades programme. We put our unrivalled OE know-how and unique features into every replacement Wiper Blade we make, ensuring they deliver a clear, streak-free finish across thousands of driving miles. And with an extensive range of technologies and fitting options available, DENSO is your complete supplier.

Why choose DENSO Wiper Blades

> Original equipment technology and quality guarantee outstanding wiping performance
> Durable, non-corrosive materials, including a natural, high compression rubber wiper, deliver long service life
> Evenly cut edges ensure an effective wiping edge
> Low profile inserts provide the perfect wiping angle
> High coverage of Asian and European vehicle applications offer optimum customer convenience

So when you need replacement Wiper Blades, there's only one name to choose: DENSO.

Range

As well as superior OE quality and advanced design, DENSO's Wiper Blade programme for the aftermarket offers complete convenience and choice.

With almost 1,800 applications – covering more than 90% of the European car parc - there is a DENSO Wiper Blade for almost every car. Yet that coverage is achieved with a compact range; making the programme the most consolidated range in the aftermarket."

What's more, the DENSO programme offers three essential Wiper Blade types, and a choice of easy fitting options including bayonet, hook or twin screw installation systems. Choose from:

Standard Blades - A popular choice for the everyday motorist, DENSO's Standard Wiper Blades offer all-round, long-lasting performance with a selection of different blade and installation options. As well as front windscreen wipers, this range also includes OEM specification Rear Wiper Blades, ensuring a complete replacement option for customers.

Flat Blades - Intelligently engineered for close, even contact on any windscreen, DENSO's Flat Wiper Blades deliver long-lasting, streak-free performance in all weathers. Now you can also upgrade your left-hand drive customers from conventional blades to DENSO's stylish, superior performance Flat Blade technology by selecting from our extensive Retrofit Flat Blade range.

Hybrid Blades - Truly advanced, OEM specification wiping technology - developed by DENSO - that blends outstanding wiping performance with stylish, integrated design. You can also take advantage of our Retrofit Hybrid Blade range. Covering hundreds of key applications the range enables your customers to upgrade from standard blades to high performance Hybrid Wiper Blades.

Wiper Blades | Introduction

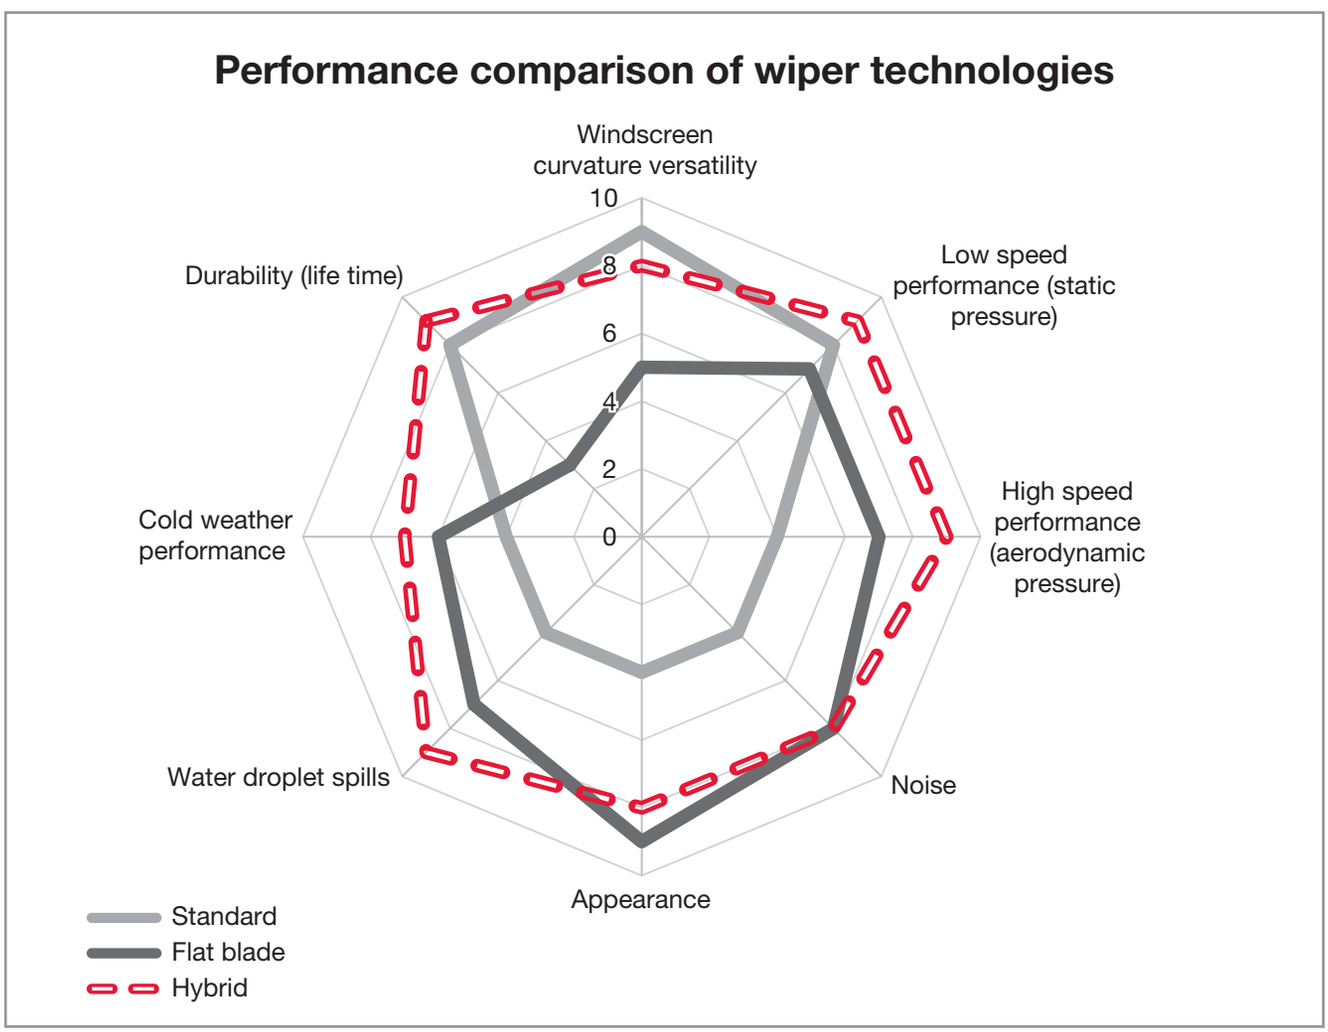

GB

Wiper technologies compared

Each of the three Wiper Blade technologies in DENSO's range offers specific benefits. There are a number of industry-wide, core performance measures that differentiate each type; helping you choose the best blades for your needs:

> **Windscreen curvature versatility:** Will the blade match both very flat windscreens and extremely curved ones? This is key for aftermarket businesses and ensuring a consolidated range
> **Low speed performance (static pressure):** This provides the initial performance parameter
> **High speed performance (aerodynamic pressure):** Essential for premium sector cars, and vehicles that are often driven on motorways
> **Noise:** Are the blades noisy during use?
> **Water droplet spills:** Do many water droplets fall off the blade and onto the windscreen after wiping?
> **Cold weather performance:** Of particular importance in colder regions
> **Dust resistance and durability (life time):** Dry wiping, sandy particles and UV radiation are the most common causes of premature wear – but rubber composition and blade construction can be optimised to improve these characteristics
> **Appearance:** Modern, sleek designs upgrade the appearance of the car

The chart below compares the performance of each DENSO wiper technology, based on these performance parameters. In general, Hybrid Blades combine the best characteristics of both Standard and Flat Blade designs.

Wiper Blades | Technologies and Fitting Options

GB

Standard Blades

One of our top-selling Wiper Blade ranges, DENSO's Standard Blades offer a selection of four, advanced blade profiles – including Rear Wiper Blades – to suit different windscreens and vehicle styles. There are also four different choices of installation system, and three clip options to suit you and your customer.

DENSO's Standard Wiper Blades offer:

> Durability
> Strong, all metal blade arm
> High-compression rubber wiper
> Efficient design
> Effective wiping edge with evenly cut edges
> Low profile inserts provide the perfect wiping angle
> Eight, evenly spaced contact points

Curved Wiper Blades

Many popular European cars use a curved Wiper Blade on the passenger side. The design ensures a larger wipe area, without hitting the car body. DENSO makes this technology available for the aftermarket.

Frowned Wiper Blades

The unique design of Frowned Wiper Blades enables even better shape adjustment, and is particularly suited to vehicles with extreme windscreen curvature.

Spoiler Wiper Blades

DENSO's vehicle manufacturer customers fit Wiper Blades with spoilers. This helps to sustain optimum wiping performance during high speed driving.

Straight Wiper Blades

As the most commonly used design, straight Wiper Blades are available as low profile (DM-0) and high profile (DM-5). There is also a further option of designated Wiper Blades for twin screw applications (DR and DRT).

Rear Blades

Adding further convenience, DENSO's Standard technology Rear Wiper Blades ensure clearer rear-view visibility. Offering all the features and benefits of our Standard Wiper Blades, and two types of easy-fit connectors, the range of rear blades covers 765 major applications. A wide range of lengths are available.

Flat Blades

A triumph of engineering design, DENSO's Flat Wiper Blades hug every windscreen closely and evenly to wipe away rain and debris in even the worst weather conditions. With sleek styling and long life, they offer all-round appeal to every motorist.

DENSO's Flat Wiper Blades offer:

Superb performance
> Precise tailoring to the curvature of your windscreen for optimum efficiency
> Even pressure distribution across the whole length of the blade delivers maximum windscreen contact; ensuring excellent visibility and safety in critical weather conditions
> Aerodynamic profile ensures outstanding performance even at high speeds
> Resistance in cold weather conditions – no icing of superstructure
> Reduced surface area minimises wind noise

Easy fit
> Innovative arm fitment makes blades easier to change, without the need for an adapter

Innovative design
> Elegant, bracketless styling
> Integrated aerodynamic spoiler

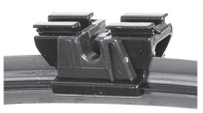

Customer convenience
> Sold by set, vehicle specified

Flat Blade Retrofit options

DENSO offers an additional retrofit option for drivers looking for a stylish, modern alternative to Standard Wiper Blades. Our extensive, easy-fit Retrofit Flat Blade references offer elegant design and a quieter action than standard blades, for a wide range of key left-hand drive vehicle applications.

DENSO's Retrofit Flat Wiper Blades offer:

OE performance
> Rigid coated rubber reduces wear
> Aerodynamic design for quiet operation
> Blades do not clog, delivering better performance in colder conditions

Easy fit
> Innovative arm fitment and standard U-hook make blades easy to change, without the need for an adapter

Attractive design
> Ultra-slim, aerodynamic design with an unobtrusive, low profile
> Elegant, bracketless styling featuring precision-tensioned steel springs

Customer convenience
> Sold by piece, conveniently consolidated range

Hybrid Blades

The combined advantages of advanced engineering, superior materials and futuristic design make DENSO's Hybrid Wiper Blades some of the most desirable in the world. It's no wonder they are the original equipment choice of some of the world's top vehicle marques. Featuring the same exacting technologies, our aftermarket range is the first to be launched by an OEM brand - and gives you and your customers unprecedented access to the future of wiper technology.

DENSO's Hybrid Wiper Blades offer:

Dynamic design

> Fully covered, stylish, matt black body
> Low profile, unobtrusive shape
> Easy to attach to wiper arm
> Integrated fitting system

Superior performance

> Common-use vertebra ensure superior surface-hold to the windscreen
> Rigid, graphite-coated rubber blade for smooth, more efficient wiping performance
> Longest life time
> Lowest noise levels on the market
> Highly resistant to dirt and dust
> Cover protects the rubber from UV and other weather conditions
> Better performance in cold conditions; hardly affected by ice or snow

Customer convenience

> Conveniently consolidated range

Style and Substance

DENSO introduced Hybrid Wiper Blades to the OE market in 2005. Designed with an integrated, fully covered blade and wiper arm they combine sophisticated design with a low, out-of-view profile. Inside the wiper housing, common-use vertebra deliver superior surface holding capability; whilst the rigid, graphite-coated rubber blade delivers a smooth, more efficient wiping performance.

Hybrid Retrofit / Upgrade options

DENSO is pleased to confirm that the Standard, original equipment Wiper Blades fitted on a huge range of vehicles are ideally suited for upgrading to DENSO Hybrid Wiper Blades. This therefore brings extensive upgrade potential. To meet this, DENSO's Hybrid Wiper Blade range has now been completed with a new fitment clip designed to fit larger U-hooks – thereby increasing the range's retrofit coverage of European vehicle models.

DENSO's Retrofit Hybrid Blades offer:

The very best, year-round performance

> Rigid, graphite-coated rubber for smooth, durable wiping
> Aerodynamic design reduces blade noise when in use
> Very versatile for a wide range of windscreen curvatures
> Combined design of Standard and Flat Blade technology ensures the best mix of benefits for heavy-duty and high speed applications

Easy fit

> Simple OEM click-on fitment, with additional clip supplied for large hook attachment

Attractive design

> Ultra-slim, aerodynamic design with an unobtrusive, low profile
> No raised connector clip

Customer convenience

> Sold by piece, conveniently consolidated range

Wiper Blades | Replacement Signs

GB

Inspection and Replacement

Wiper Blades are a crucial vehicle safety feature. They must be in good enough condition to clear all rain, insects, dirt and snowflakes that can collect on the windscreen. Use our guide to Wiper Blade inspection and replacement for safer, clearer driving vision.

Replacement advice

> **How often should a Wiper Blade be replaced?**
As a rule windscreen Wiper Blades should be replaced at least once per year. In northern Europe they will usually need replacing once in summer and once in winter as light and moisture deteriorate the rubber blade. In southern Europe the Wiper Blade's lifetime is shortened by intensive sun light (UV radiation), and will usually need annual replacement.

> **Why replace?**
Wiper Blades eventually deteriorate with use, producing a streaky or uneven finish on the windscreen. To ensure a clear, safe field of vision even in bad weather, it is important to ensure the Wiper Blades are regularly checked and replaced as soon as deterioration is seen.

Make it a date
As a general rule, Wiper Blades should be changed once a year.

Replacement Signs

These are the four main signs of Wiper Blade deterioration that are visible on the windscreen glass. These symptoms will help you determine when a Wiper Blade needs changing.

Streaking

Symptom:
> Narrow streaks are left on the windshield.

Cause:
> Foreign matter has attached itself to the rubber blade, or the edge of the blade is worn.

Remedy:
> First, clean the edge of the blade. If streaks still appear, replace the Wiper Blade.

Jumping

Symptom:
> The Wiper Blade does not move smoothly across the windshield, but vibrates noisily and bounces due to dirty wind screen.

Cause:
> Incorrect arm angle or worn out Wiper Blade.

Remedy:
> First, clean the windshield; then check the angle. If jumping persists, adjust angle and/or replace the Wiper Blade.

Unwiped Spots

Symptom:
> Wiper Blade leaves one or more unwiped spots.

Cause:
> Wiper Blade deformation or rubber deterioration.

Remedy:
> Replace Wiper Blade.

Uneven Blade Pressure

Symptom:
> Wiper Blade does not contact the windshield surface evenly, leaving a large unwiped surface.

Cause:
> Worn Wiper Blade.

Remedy:
> Replace Wiper Blade.
